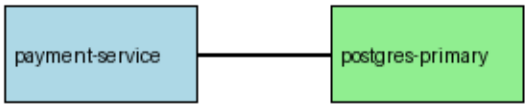
Runbook: payment-service connection pool exhaustion

This runbook describes the remediation steps for ERR-503 errors caused by connection pool exhaustion on postgres-primary. This is plain prose text that a normal text extractor should handle fine, with no tables or images mixed in on this part of the page.

Error code reference table

Error Code	Severity	Owning Team
ERR-503	P1	payments-infra
ERR-429	P3	payments-infra
ERR-500	P2	platform

Dependency diagram



More prose after the image and table, to confirm later text on the page is still captured correctly.
